Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status							
1)⊠	Responsive to communication(s) filed	d on <u>30 December 2003</u>					
2a)□	This action is FINAL . 2b) This action is non-final.						
3)	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.						
Disposit	ion of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 1. Claims s 1-7, 11—21 are rejected under 35 U.S.C. 102(e) as being anticipated by US Paten NO. 6361523 to Bierman.

Bierman teaches an infusion system with a housing 20 having a general flat bottom and a connecting hub110, the connecting hub having an internal Y-shaped flow channel structure. The flow channels comprises of a first flow channel connected to a proximal end of infusion cannula and exit the distal end of the hub, a second flow channel exit form proximal end of the hub and a third flow channel exit form a proximal end of the hub. An infusion cannula may be received in the distal end of the housing. The connecting hub is attached to the proximal end of a housing via fasteners. The channel in housing is tapered (as demonstrated by figure 6 the channel is tapered at the distal end, also see figures 6, 12-13, 21)

2. Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by US Paten No.4755173 to Konopka et al

Art Unit: 3763

Konopka teaches an infusion system with a housing 412 having a general flat bottom and a connecting hub, the connecting hub having an internal Y-shaped flow channel structure. The flow channels comprises of a first flow channel connected to a proximal end of infusion cannula and exit the distal end of the hub, a second flow channel exit form proximal end of the hub and a third flow channel exit form a proximal end of the hub. An infusion cannula may be received in the distal end of the housing. The connecting hub is attached to the proximal end of a housing via fasteners. The channel in housing is tapered (see figure 11).

Response to Arguments

3. Applicant's arguments with respect to claims 1-21 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roz Maiorino whose telephone number is 703-305-2336. The examiner can normally be reached on 8:30am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on 703-308-3552.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
